

## CIT316 – Advanced Software Design

### Tutorial 01

#### Part One

1. What is the purpose of the Software Development Life Cycle in real-world software engineering? (briefly explain).

#### Part Two

1. What are the advantages of the Waterfall model in large-scale enterprise systems?
2. What are the advantages of Agile methodology in modern software development?
3. Compare Waterfall and Agile in terms of:
  - Flexibility
  - Risk handling
  - Customer involvement
  - Documentation
4. In what situations is Waterfall more suitable than Agile?
5. Why do many organizations shift from Waterfall to Agile today?

#### Part Three - Practical thinking

1. A startup needs to launch a mobile app quickly. Which methodology should be used and why?
2. A project has unclear requirements that change frequently. Which methodology is best and why? Explain briefly.

#### Submission

Create a **short report (PDF)** and rename it as follows:
