

CIT316 – Advanced Software Design

Tutorial 08

Part One

1. What is CI/CD and what issue occurs without CI/CD? Explain in your own words and you can use related diagrams also.
2. What is containerization? Explain in your own words.
3. What is the difference between a container and a virtual machine? In your answer compare the following features.
 - Resource usage
 - Startup time
 - Portability
4. What problem does containerization solve in software development?
5. What is Docker and explain how Docker helps in containerization.
6. Why Use Docker in CI/CD?
7. What is a Docker Image?
8. What problem does Docker solve?

Part Two

1. Practical thinking and scenario based question

Scenario:

A developer says:

"My application works on my laptop but not on the server."

Questions:

- 1.1 What is the issue here?
- 1.2 How can containerization solve this problem?

Submission

Create a **short report (PDF)** and rename it as follows:

ASD_Tutorial_08-<your index number>-<your name>.pdf
